REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is directed to an olefin block copolymer having a Mw/Mn of not more than 1.5, wherein said block copolymer comprises: (i) a polymer block of ethylene-alpha-olefin, having a molar ratio of ethylene units to alpha-olefin units of from 20/80 to 65/35, and a weight average molecular weight of 50,000 to 2,000,000, and having a slope of an intramolecular composition distribution of absolute value of 0.1 to 0; and (ii) a polymer block of ethylene-alpha-olefin, having a molar ratio of ethylene units to alpha-olefin units of from 70/30 to 85/15, and a weight average molecular weight of 10,000 to 400,000, and having a slope of an intramolecular composition distribution of absolute value of 0.1 to 0.

2. Upon reconsideration of the evidence of record together with applicants' arguments it has been found that the closest reference to Ver Strate et al U.S. Patent 4,804,794 does not disclose an intramolecular composition distribution having absolute value of 0.1 to 0 in each ethylene-alpha-olefin polymer block (i) and (ii) as defined in the present claim 1. Also, the copolymers of Ver Strate invention comprise two copolymer blocks having very close ethylene content, such that at least about 57 wt.% in one ethylene-alpha-olefin polymer block and not greater than about 53 wt.% of ethylene content in other ethylene-alpha-olefin polymer block.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
